RECOMMENDATION LETTER FOR TEUFIK TUTUNDŽIĆ

TO WHOM IT MAY CONCERN:

I am writing this reference at the request of Teufik Tutundžić, who is applying for the mobility scholarship programme EUROWEB+.

I am an Associate Professor at the Faculty of Electrical Engineering, University of Sarajevo, where I teach courses at the Department of Automatic Control and Electronics, and the Department of Computing and Informatics. Currently, I am also Dean of the Faculty of Electrical Engineering. My main fields of interest encompass optimization, heuristic algorithms, embedded systems and optimal and intelligent control. I know Teufik since the second year of his study, when he attended one of my courses focusing on data acquisition and simulation of dynamic systems. After that, Teufik attended my course on embedded systems at the third year of his study. On both of these courses, Teufik's performance was excellent.

In my opinion, Teufik Tutundžić is one of the best students in his generation, and his results were always in the top 15%, not only on my course. He possesses wide knowledge in the fields of computer science, control theory and electronics. Therefore, he always completed his tasks, homework and seminal works in time. Since my courses which he attended insisted on team work (with exchanging the roles of team members and team leader among students for different projects), I can say that Teufik is an excellent member of team, contributing to successful realization of the project in that way. He was also an excellent good team leader, capable of distributing and assigning tasks to the members of his team. His interaction with colleagues was always very correct and full of mutual respect.

In case that you need any additional information, which I can provide, please don't hesitate to contact me by e-mail skonjicija@etf.unsa.ba.

Sincerely,

Dr Samim Konjicija
